Release Letter

Product:	<i>MPEG-ActiveX</i>
Version:	<i>4.24.01.02</i>

This letter contains latest information about the above mentioned software version.

1. New Features

- This version supports enhanced Archive Player 2.20 functionalities.
- The optional overlay, providing visualization of detected motion and object information – including colour - as well as alarms, is enhanced by support for IVA 3.50 (Intelligent Video Analysis).
- The IVA Task Wizard plug-in for IVA 3.50 has been included which can also be initiated from the Web browser.

2. Restrictions; Known Issues

- For 32-bit color mode the PC must support YUV overlay.
- For MPEG-2 rendering on Nvidia graphic cards, use driver version 71.84 or older for optimal performance.
- Streaming works only if a RCP+ connection is established. If multicast streaming is enabled, a device can only connect to the stream if a RCP+ connection exists. Although the multicast address is enabled, the IP address must be set in addition.
- The following products are supported:
VideoJet 10, VideoJet 8000, VideoJet 8008, VideoJet X series, VIP X1/X2/XD,
VIP 10, VIP 1000, VIP X1600, Dinion IP, AutoDome IP, Flexidome IP,
VIDOS-NVR, VIDOS Monitor Wall
